Buildings in Parcel 2 should be located on the setback line with no parking between the building and street right-of-way along Westport Parkway, unless otherwise oriented to access roads in a campus design or developed in conjunction with designated public or city owned parking properties. Off-street parking should be behind or beside the building when possible. Buildings should be arranged to create view corridors between pedestrian destinations within and adjacent to the site including building entrances and open spaces. The corners of street intersections, particularly site entries, should be distinguished by special landscape or architectural treatments. The use of alternate paving materials to designate pedestrian traffic areas from vehicular use areas and travel lanes is strongly encouraged. The design of all streets and parking lots shall permit the travel of the fire department’s vehicle access requirements. Overhead doors and loading docks shall be totally screened from public streets. When possible, the integration of storm drainage and detention should be designed to enhance the public space.

D. Access and Off-Street Parking

i. Access. Driveways shall be located so that no undue interference with the free movement of road traffic will result, to provide the required sight distance, and to provide the most-favorable driveway grade. Access points within the development shall be limited to what is shown on the final plat and subdivision agreement. Any deviation from this shall require the approval of the City.

ii. Off-Street Parking. Parking on lots in Parcels 1 and 2 shall be provided based on the aggregate ratio of four and a half (4.5) off-street parking spaces per one thousand (1,000) square feet of gross leasable floor area of improvements constructed on each lot, unless off-site/public parking is utilized with approval of the city.

a. Landscaping.

(1) Off-street parking areas containing twenty-five (25) or more parking spaces shall provide internal landscaping, other than that required in a buffer zone or along street frontages, and shall be protected by a concrete curb.
(2) Landscape islands a minimum of seven (7) feet in width shall be provided at the end of all parking rows. In addition, landscape islands a minimum of seven (7) feet in width shall be provided throughout the parking lots such that no parking space is farther than one hundred twenty (120) feet away from any landscaped space.

(3) Required trees shall be located to minimize potential damage to vehicles, to insure adequate sight distance, and the maneuvering of emergency vehicles within the development and each lot.

(4) The internal landscaped areas shall be located to direct traffic, dispersed throughout the lot to improve site aesthetics, and installed so that, when mature, it does not obscure traffic signs, fires hydrants, lighting, drainage patterns on site or adjacent properties, or obstruct vision for safety of ingress or egress.

(5) Parking areas shall be screened, recessed, or otherwise constructed and located so as to prevent the glare from automobile headlights illuminating adjacent properties and to minimize negative views from public streets.

(6) Parking area lighting shall be shielded so as to prevent illumination of adjacent properties. A lighting plan shall be submitted for review in conjunction with any site plan.

(7) Off-street loading areas shall not interfere with or impede the circulation or flow of traffic.

E. Signage

All signs may be permitted with approval of a sign permit based upon the adopted sign regulations, except as modified herein. To the extent that the provisions of this PUD Plan conflict with or are more restrictive than similar provisions provided in the La Vista Zoning Ordinance, the provisions of this PUD Plan shall control.

This Ordinance recognizes that because of the size and scope of the project, and because access will be obtained to the development via large public arterial streets, the project has an extraordinary need for flexibility in the signage regulations applicable thereto.

i. Subdivision Signs. Two subdivision signs not to exceed fifty (50) square feet and fifteen (15) feet in height shall be allowed at each of the three (3) main entrances. Architectural elements of such signs shall not exceed maximum height for structures in the respected zoning district. The usage of such signs shall be limited to identification of the development itself. Such signs shall be setback a minimum of twenty (20) feet from the property line.

One electronic message sign of no greater than twenty-five (25) feet in height may be allowed along the Interstate for City, conference and/or subdivision information, including events and business identification. Such sign shall be setback a minimum of twenty (20) feet from the property line and located upon a dedicated easement. Such sign shall not be of such intensity as to adversely affect adjacent properties or vehicular traffic.

iii. Project Directory Signs. Project Directory Signs shall be allowed on the internal roadways of the subdivision to help facilitate movement through and around the development. The sign area, setback, and number of project directional signs located within the development shall be determined in conjunction with the issuance of the sign permit for the development. The Project Directory Signs may contain directional information about the location of individual businesses within the development, and such information may set forth the name of the business and use logos, service marks, or stylized letters that are identified with that business. Any Project Directory Sign may contain the Developer’s logo for the development.

iv. Center Identification Signs. Multi-tenant buildings, multi-attached buildings and free standing buildings as part of a mall in Parcel 2 may be allowed to advertise on center Identification signs. Such signs shall be a maximum of twenty-four (24) feet in height and contain a maximum of one hundred fifty (150) square feet of signage. Center identification signs may be allowed for individual users to identify their location off of internal streets or driveways with the approval of a sign permit. Such signs may include logos; located at least twenty (20) feet from the street right-of-way and ten (10) feet from the property line; and at not more than one per entrance.
v. Monument Signs. Monument signs for standing buildings in Parcel 2 shall not exceed twenty (20) feet in height. Such signs may include logos; located at least twenty (20) feet from the street right-of-way and ten (10) feet from the property line; and at not more than one per street frontage.

Section 9. That this Ordinance shall be in full force and effect after its passage, approval, and publication in pamphlet form as provided by law.

PASSED AND APPROVED THIS 15TH DAY OF NOVEMBER, 2005.
