RE: - LaVista City Centre Hydrant Relocation Project WP1929 (100051001060 and 100065001687).

Mr. Dowse,

Per the City of LaVista's request, the Metropolitan Utilities District (The District) will prepare and design plans to install a fire hydrant northeast of 84th Street and Brentwood Drive. At the same time The District will abandon approximately 230 feet of existing 8" water main, located east of this new fire hydrant.

The District will have costs incurred, including but not limited to the drafting and designing of the plans, installation of the hydrant, abandonment of the existing 8" water main, flushing of the line, water quality testing and inspection of the project during and after the relocation. The total estimate for the work to be performed by the District is \$20,000.00 and because this project is of a private nature, it is reimbursable. This estimate does not include any restoration costs to replace sidewalk or pavement, it is understood that the City of LaVista will be responsible for all restoration costs. All associated District work will be billed on a time and material basis. If the estimated cost for the work is not sufficient to cover the actual cost, the City of LaVista shall pay the District the difference. If the actual cost for the work is less than the amount paid, the difference will be refunded to the City of LaVista.

Before this work can be released for construction, a check, made out to "Metropolitan Utilities District", for the estimated amount, will need to be submitted. Please send the check to my attention, Engineering Department, 7350 World Communications Dr., Omaha, NE, 68122-4041. Receipt of the check will indicate the City of LaVista's agreement to the District's terms herein.

If you have any questions, please call me at (402) 504-7648.

Sincerely,

Brett Bleske
