<b>Subject:</b>	<b>Type:</b>	<b>Submitted By:</b>
ADOPTION OF THE FY27-FY31 CAPITAL IMPROVEMENT PROGRAM (CIP)	◆ RESOLUTION ORDINANCE RECEIVE/FILE	MEG HARRIS FINANCE DIRECTOR

**SYNOPSIS**

A public hearing has been scheduled and a resolution has been prepared to approve the 2027-2031 Capital Improvement Program (CIP).

**FISCAL IMPACT**

Year 1 and Year 2 of the CIP will be recommended for funding in the FY27-FY28 Biennial Budget proposal.

**RECOMMENDATION**

Approval.

**BACKGROUND**

The recommended capital improvement program for years 2027-2031 identifies funding for the city's critical infrastructure projects in the amount of \$14.4M in FY27 then \$25.5M in FY28. Over the course of the five year program the city anticipates investing a total of \$54.7 in public improvements. The investments by project area are as follows:

- \$16.3M Parks
- \$1.9M Public Facilities
- \$10.6M Sewer
- \$25.8M Streets

Approximately 25% of the projects are associated with the city's strategic priority related to 84 St. redevelopment.

The CIP plan also contains a comprehensive list of unprogrammed projects totaling \$21M. Projects on this list may require additional direction regarding prioritization, planning and strategic development, clarity on project timing etc. The projects will continue to be addressed through the biennial CIP review process.

As required by state statute the Planning Commission held a public hearing on November 20, 2025 and voted unanimously to recommend to the City Council that the FY27-FY31 CIP be approved.

## Capital Improvement Plan

La Vista, Nebraska

Project #	ADMN-22-001
Project Name	Wayfinding Implementation

Total Project Cost	\$1,000,579	Contact	Deputy Community Development Director
Department	Administration	Type	Construction
Category	Wayfinding	Status	Active
Plan Name	Comprehensive Plan		

### Description

The Wayfinding Plan was accepted by the City Council in 2022, and staff has subsequently developed an implementation strategy. The Plan provides basic designs for various directional, parks, and building signage throughout the city, as well as other wayfinding structures. The plan for implementing the placement of these wayfinding signs is nearly completed and costs estimates have been made for the phased final design, placement and construction of signs and structures. New signage placement has been completed in most of the City's smaller parks in the past year. Wayfinding improvements include: Parks Signage - 2023/2024/2025 - 21 Signs Vehicle Directional Signage - 2024/2025 - 36 Signs Destination Arrival & Building ID - 2025/2026 - 12 Signs Secondary Entry, Tertiary Entry - 2026/2027 - 10 Signs Primary Gateway Signs - 2027/2028 - 6 Signs Bike/Pedestrian Signage - 2028/2029 - Sign # TBD

### Justification

The proposed funding is to implement the Wayfinding Plan adopted by the City Council. It will ensure that signage, wayfinding structures and artwork as recommended in the study and the implementation plan gets constructed. The La Vista brand process was pursued to establish a distinct community identity. While developing the brand, the need to educate people about the boundaries between communities became apparent. During the research phase we heard that there is nothing distinctive about any community in the area. In fact, one of our greatest challenges was our undefined identity, and it has been clear over the years that most people do not know if they're in La Vista or where La Vista is in the context of the metro area. This lack of differentiation is an opportunity for La Vista to make the City's entryways distinct from surrounding communities. One of the most significant ways to do this is through signage and other infrastructure, such as through a wayfinding program. Wayfinding is specifically identified in the Shop 1.4 goal of the Comprehensive Plan: Invest in high-quality streetscapes in these areas, including plazas, public art, pedestrian amenities, and wayfinding signage (the process of getting a visitor from point A to B). It is also listed in Shop 3.3: Install streetscape improvements along 84th Street, including landscaping, wayfinding, lookout areas or view corridors, and other amenities. This project is also referred to in Move 3.1, Fun 1.3, and Fun 3.1.

### Budget Impact

The implementation of the wayfinding plan has been divided into six separate phases spread over at least seven years to make the project more financially feasible. There will be costs associated with maintenance of the signage.

Project # ADMN-28-001  
Project Name Public Works Truck Storage Expansion Building

Total Project Cost	\$900,000	Contact	Building Superintendent
Department	Public Buildings	Type	Construction
Category	Building Construction	Status	Active
Useful Life	25 years		

### Description

Add a covered truck storage building north of the main public works facility. Anticipated Start Date: October 2027 Length of Project: 1 yr Estimated Completion Date: September 2028

### Justification

A large portion of public works large scale equipment and police department specialty vehicles are stored outdoors throughout the year because of a lack of available indoor storage space. This project would build a large covered cold storage building to the north of the main public works facility. The building would mainly be used to store public works fleet of dump trucks, and police specialty vehicles, where they would be covered and could be plugged in during the winter for snow removal operations.

Project Name Swimming Pool Design & Construction

Total Project Cost	\$9,350,000	Contact	Recreation Director
Department	Swimming Pool	Type	Construction
Category	Park Improvement	Status	Active
Useful Life	30 years	Plan Name	Park & Rec Master

### Description

The municipal swimming pool was demolished in 2024 as it was 60+ years old and has reached the end of its useful life. It required significant maintenance each year in order to get the pool operational for the season and replacement parts were often unavailable and must be manufactured. Additionally, the Civic Center Park Master Plan calls for the park to connect to the west side of 84th Street via an underpass, which would be located directly adjacent to the existing pool site. In order to facilitate the underpass connection and utilize the space west of 84th Street it is necessary to demolish the existing pool and construct a new one in a different location. Construction of a new pool is currently programmed in FY28. Anticipated Start Date: 2026 (Design), 2028 (Construction) Length of Construction of Project: 2 years Estimated Completion Date: 2029

### Justification

The goal of this project is to continue to provide a functional municipal pool to our citizens and accommodate the connection between Civic Center Park and the west side of the City. Preliminary design work has been substantially completed on a new pool and public meetings have been held to receive input regarding the design and potential location of a new pool. The City Council has selected a site in Central Park West near 87th Street.

### Budget Impact

There will be increased personnel, utility and operational costs associated with a larger aquatic facility. The City's swimming pool consultant, Waters Edge, provided expense projections (2024 numbers) based on assumptions relative to the size of the pool, programming and hours of operation. The numbers shown below as operational impact are the difference between what we have budgeted currently for pool operations and the Water's Edge projections. Annual increases of 3% are assumed.

Department	Public Works - Parks	Type	Construction
Category	Trail Development/Construction	Status	Active
Useful Life	20 years	Plan Name	Park & Rec Master

### Description

This project will create a trail connection between the current Keystone Trail at S. 69th Street and a future underpass on 84th Street. Public Works recently submitted for and was approved to receive Transportation Alternative Program (TAP) funding in the amount of \$1,456,000 for this project. The city's portion to fund this project is \$700,000 spread over the 3 Fiscal years. Anticipated Start Date: Fall 2025 Length of Project: 2 Years Estimated Completion Date: Late Fall 2027

### Justification

Project Name Central Park West Infrastructure

Total Project Cost	\$1,595,000	Contact	City Engineer
Department	Public Works - Parks	Type	Construction
Category	Park Development/Construction	Status	Active
Useful Life	10 years	Plan Name	Park & Rec Master

### Description

As part of the previous Placemaking and Landscape Design project, a plan for Central Park West (the area adjacent to Central Park and West of 84th Street), was created. The area is approximately 8 acres in size and a portion of it was chosen by the City Council as the location of a potential new community swimming pool. The remaining area was proposed for use as event/festival space. A schematic design for the event space was produced. As the City begins to develop this area, it is recommended that some base infrastructure be installed. This CIP project provides funding for final design and construction documents for this infrastructure, which includes water and sewer connections that will be needed for the proposed swimming pool, trail connection to the 84th Street underpass, parking and green space. A phasing strategy for future improvements to the area would also be completed. Anticipated Start Date: October 2025 Length of Project: 3 years Estimated Completion Date: September 2028

### Justification

The regional park concept for this area was created as an impetus for development along the 84th Street corridor and to provide a gathering place for the public to enjoy. Creating spaces where community events can be held and extending the park concept to the west side of 84th Street supports the City Centre development as well as providing space for other area event organizers to bring activities to La Vista.

### Description

Park Matrix Plan funding will give the City a set fund to handle park projects that come up outside of major planned improvements. Sometimes repairs are needed right away for safety, or staff identify needs based on resident feedback. Having this funding in place allows us to respond quickly instead of waiting for the next budget cycle. This helps keep our parks safe, well-maintained, and better aligned with community needs.

Project Name Central Park Boardwalk Ramp

Total Project Cost	\$350,000	Contact	Senior Planner
Department	Public Works - Parks	Type	Construction
Category	Park Improvement	Status	Active
Useful Life	20 years		

### Description

Construction of a ramp from the Boardwalk in Central Park to the trail system around the lake to provide an accessible route for people using wheelchairs or strollers, or for whom utilizing stairs is difficult. An alternative project to be evaluated within this same anticipated cost would be the construction of a trail west of the boardwalk that would still provide the accessible connection. Anticipated start date: Jan 2027, Length of Project: 9 mos, Est completion date: Sept 2027

### Justification

This trail improvement was identified as proposal #44 in the Active Mobility Plan. The Mayor and staff have received resident inquiries and support for this project so that more people are able to utilize the full loop around the lake. Especially once the underpass is complete and a trail constructed from Central Park through to Central Park West, this route through the boardwalk will only become more desirable and heavily utilized.

### Supplemental Attachments

[84th Street Redevelopment Plan - Redevelopment](#)

### Description

This project is to implement the use of ALPR (automatic license plate readers) cameras in the area around the 84th Street Corridor and redesign project. These cameras would be dual purpose cameras. They would allow for the reading of license plates as well as the live streaming of video in the areas where the cameras are installed. The type of camera being referenced is the L6D (Motorola).

The initial phase of the project would entail the installation of approximately 24-38 cameras surrounding the redevelopment area. Cameras along S 84th St itself would be held until construction has progressed and new light poles have erected. Approximately 10-12 cameras would be needed along S 84th Street itself. Anticipated start date: Oct 2026, Length of Project: 1 year, Estimated completion date: Sept 2027

### Justification

The justification for this project is the advancement in technology needs of the city and the police department to maintain a safe working, living and shopping environment for the people living, working and doing business in the city.

The use of ALPR cameras serves a dual purpose in providing data on vehicles traveling into and out of our community as well as within the community. The dual purpose of the cameras will also provide live streaming capabilities to provide for real time video should any situations of a critical nature arise. Real time information plays a vital role in providing information to first responders to an incident as well as providing archived information after an incident has taken place. Cameras along traffic ways will serve both purposes of monitoring traffic ingress/egress, congestion and also provide real time video for security. These same cameras can be placed along the trail to provide the real time video for security purposes and to also provide "peace of mind" for those traveling the trail. Additionally, with proper placement of some cameras in areas around our schools, additional security can be made available to compliment video systems the school district has in place.

**Description**

This project will remove the existing twin siphon barrels that convey sanitary sewer flows under the Big Papillion Creek from the east half of La Vista to the Omaha interceptor line. These new siphon barrels will be of similar size, but will be placed at a deeper elevation to prevent erosion and damage around the barrels. Anticipated Start Date: 2029 Design, 2030 Construction Length of Project: 2 Years Estimated Completion Date: Fall 2031

**Justification**

If not addressed the erosion will eventually cause the siphon to break free discharging it into the Big Papillion Creek. The existing siphon at the junction of Thompson Creek and the Big Papillion Creek has been exposed due to ongoing creek erosion. Temporary repairs were made to the existing siphon barrels in 2017, however, full replacement of the sanitary sewer siphon is needed.

### Description

This project includes the removal of the chain-link backstops and replaces them with a pole and netting system that is higher and covers more area. The current backstops are not adequate for securing foul balls in the field of play, and the City has to supplement with our own netting above the backstop. Project Name	Streetscape Phase 2

Total Project Cost	\$2,650,000	Contact	Deputy Community Development Director
Department	Community Development	Type	Improvement
Category	Redevelopment	Status	Active
Plan Name	Comprehensive Plan		

### Description

With the completion of 84th Street Trail (Phases 1A-1C of the Streetscape Plan) in FY27, the start of Phase 2 will be the next step in the Streetscape Project. Phase 2 will consist of new decorative streetlights along the 84th Street Corridor. Lighting along the pedestrian path will be added at the same time to improve the comfort, safety and security of pedestrians in the area. This phase will also involve tree plantings on either side of the corridor to replace those trees removed from the Phase 1 activities and enhance the overall tree canopy along the corridor. Finally, the irrigation for the trees and the plantings planned for future phases will be installed at this time as well.

Anticipated Start Date: Oct 2026, Length of Project: 2 years, Estimated Completion Date: Sept 2028

### Justification

The Vision 84 plan calls for "Unique streetscape enhancements along 84th Street" as one of the goals of the master plan. The conceptual design portion of this project has been completed and cost estimates provided. Construction documents have been prepared and a phasing plan for construction has been developed. With the awarding of the congressional earmark for Phases 1A-1C of the Streetscape Project, these phases are expected to start construction in FY26 with completion slated in FY27. As clearing and grubbing for the first phases of the streetscape project will remove a notable number of trees along the corridor, it will be important to replant the trees along this corridor to start their multi-year maturation process. The second phase is also ideal to improve the vehicle and pedestrian lighting along the corridor. Improving the safety of pedestrian traffic along 84th Street with the opening of the Astro and the commencement of concerts. This project will help achieve goals 1.1 Provide unique, high quality community events and amenities for residents and visitors, 1.2 Ensure the quality and availability of recreational, athletic, and educational services, 1.3 Provide and maintain safe, accessible, and healthy City parks, trails and public spaces, 1.4 Raise awareness of what makes La Vista a great place to live, visit, and do business, 2.1 Create a readily identifiable downtown core that is unique and vibrant , 3.2 84th St redevelopment, 3.3 Provide a safe, efficient, and well-connected multimodal transportation system that contributes to a high quality of life of the 2024 - 2027 STRATEGIC PLAN SUMMARY

### Budget Impact

The addition of pedestrian lighting, to the existing levels of street lighting, will increase the annual electric bill for the City. The installation of an irrigation system will also add some costs in relation to maintenance and water usage. These costs will start occurring after the completion of the project. Maintenance of the landscaping incorporated into this phase of the implementation of the Streetscape Plan will be handled by the existing staff of the Parks Department.

Total Project Cost	\$250,000	Contact	Deputy Director of Public Works
Department	Public Works - Streets	Type	Construction
Category	Street Improvement	Status	Active
Useful Life	10 years		

### Description

Ultra-thin bonded asphalt (UBAS) overlay between 72nd St. and 76th Ave. north of Terry Dr. This project is tied to the concrete base repair project (STRT-25-005) that is scheduled to be completed in the spring of 2026. The UBAS overlay will take place in 2027, and will provide a new asphalt wearing course to protect the concrete sub-structure. Anticipated Start Date: May 2027 Length of Project: 3 months Estimated Completion Date: July 2027.

### Justification

City Council set target PCI ratings in 2021 for residential streets at 70. Majority of the streets in this neighborhood average in the mid 60's to low 70's PCI ratings and that makes it a good candidate for this type of rehab work.

Project Name Storm Sewer Outfall Rehab

Total Project Cost	\$350,000	Contact	City Engineer
Department	Public Works - Streets/Sewer	Type	Construction

Useful Life	15 years		

### Description

Reconstruct failing storm sewer outfalls throughout the city. Anticipated Start Date Oct 2026, Length of Project: 4 years, Estimated Completion Date: Sept 2030

### Justification

Creek channel and bank erosion cause storm sewer outfall structures throughout the city to eventually collapse and fail which contributes to additional erosion issues along these waterways. This project would start to address fixing these outfalls with a more stable and longer term solution.

**Description**

Ultra-thin bonded asphalt (UBAS) overlay between east of 108th St. between Chandler Rd. and Harrison St. in the area around Rotella's Bakery. Anticipated Start Date: May 2028, Length of Project: 3 months, Estimated Completion Date: July 2028.

**Justification**

Majority of the streets in this area have very low PCI ratings. Public Works has successfully rehabilitated existing asphalt streets with ultra thin bonded asphalt (UBAS) successfully with minimal repair of the existing sub-structure, that is the plan for this area as well.

Project # STRT-28-003  
Project Name West Papio Southport Connector

Total Project Cost	\$2,496,100	Contact	Senior Planner
Department	Community Development	Type	Construction
Category	Trail Improvement	Status	Active
Useful Life	20 years		

### Description

The West Papio Southport Connector will provide a new trail connection from the West Papio Trail on the east bank of the West Papillion (Papio) Creek to the Southport areas to the west of the creek. Specifically, this project will include a bridge at a location north of Harrison Street and south of I-80, and a segment of shared-use path from the new bridge south along Eastport Parkway to the intersection of Eastport Parkway and Port Grace Boulevard, where it will connect to the existing sidewalk and shared-use path network. Anticipated Start Date: Oct 2027, Length of Project: 1 year, Estimated Completion Date: Sept 2028

### Justification

Currently, there are no sidewalks or trails connecting to the Southport area from Giles Road or Harrison Street. The West Papio Trail has no connections across the creek for approximately 4.15 miles, from 96th Street in Papillion to the western trail terminus at Q Street in Omaha. This critical link will enhance connectivity to jobs, service opportunities, as well as recreation. An analysis of 2022 Census data shows more than 8,200 employees within a subarea of Census Tract 106.29, generally south of Harrison Street, west of 108th Street, east I-80 and north of Giles and Centennial Road. About 1,150 of these jobs are in the accommodation and food sector. The Giles Road Corridor Study showed bike-ped commuters to Southport not only face safety concerns but add 2.2 miles to their commute by the lack of a West Papio Creek bridge (Alternative 3A). The new connections will remove a significant barrier to jobs, recreation and regional destinations, and was noted as a high priority project in the City's recently adopted Active Mobility Plan.

### Description

Project is to mill and overlay segment of road, inclusive of permanent inlaid permanent traffic markings. Anticipated Start Date: March 2030 Length of Project: 1.5 years, Estimated Completion Date: Sept 2031

### Justification

Typically, asphalt mill and overlay over concrete base in on an arterial roadway segment will require another mill and overlay operation within 8-12 years. The MAPA 2020 Traffic Flow Map shows this segment of 108th has an Average Annual Daily Traffic Volume of 15,000 vehicles per day near Giles Road to 20,000 vehicles per day near Skinner Street. Surrounding land use is Industrial, and therefore higher in truck volume percentages is likely, which increases the amount of road damage/degradation over time. Alternative Funding Options:

AMEND MASTER FEE ORDINANCE	RESOLUTION ◆ ORDINANCE RECEIVE/FILE	HEATHER BULLER RECREATION DIRECTOR

**SYNOPSIS**

An ordinance has been prepared to amend the Master Fee Ordinance to include corrections to Community Center Gym (Full) and restore to original intended fee and add convenience fee for credit card transactions taken through the Recreation registration system.

**FISCAL IMPACT**

N/A.

**RECOMMENDATION**

Approval.

**BACKGROUND**

Staff is requesting approval of updates to the Master Fee Ordinance to correct an error in the Community Center Gym (Full) rental rates and to add a 3% convenience fee for all credit card transactions processed through the Recreation Department's online system.

During a Master Fee Ordinance update, a portion of the Community Center "Gym (Full)" rental rate for Non-Residents, Business Groups, and Non-Profit organizations was accidentally mistyped. This update simply corrects the language so that these groups continue to receive the rates that were originally intended.

The Recreation Department uses ActiveNet, a point-of-sale (POS) and online registration system for sports, programs, room rentals, and daily drop-ins. Right now, the City pays the credit card fees for these transactions through a Transaction Model that is estimated to cost \$8,000 - \$15,000 in FY 26 due to the increase of participation, rentals, and drop-ins. These fees add up quickly and take money away from programs, supplies, and services. The proposed update to a Subscription Model allows the payer (the person using the credit card) to cover the 3% convenience fee, instead of the City paying it. This is consistent with how the City handles credit card fees in other departments.

The current Transaction Model includes a varying fee scale per transaction such as charges for all in-person transactions (2.9%, including cash and check), in-person credit card transactions (4.3%), and online credit card transactions (8.8 – 3.4%).

The new Subscription Model provides a flat cost of \$3,000 per year under a five-year agreement paid by the City, along with a consistent 3% convenience fee applied to credit card transactions regardless of the purchase amount. This shift is expected to save the City between \$3,000 and \$12,000 annually.

Overall, these updates improve accuracy in the Master Fee Ordinance, reduce operational costs, align the Recreation Department with existing City practices, and simplify the fee structure for both staff and the community. Staff recommends approval of the proposed changes to the Master Fee Ordinance.

- B. **Computation of Sewer Service Charges.** For the months of December, January, February and March, the monthly charge for residential sewer services will be computed on the actual water used for these months. The monthly charge for residential sewer service in the months of April, May, June, July, August, September, October and November will be computed on the average water usage of the four (4) preceding winter months of December, January, February and March or for such portion of said consumption, whichever is the lesser. At the option of the City of La Vista, water used from private wells shall be either metered or estimated for billing purposes.
- C. **Amount of Sewer Service Charges.** The total sewer service charge for each sewer service user will be the sum of three (3) charges: (1) customer charge, (2) flow charge, and (3) abnormal charge.
  - 1. The customer charge is as follows
    - a. For sewer service users classified as Residential, the same being sewer service to a single family dwelling, or a duplex, apartment, or other multi-family dwelling (e.g. apartments) wherein each dwelling unit has a separate water meter that is read and charged for water and sewer use by the Metropolitan Utilities District - \$13.49 per month.
    - b. - c. For sewer service users in this category that require manual billing, add \$10.00 for a total of \$24.47. The manual billing of the customer charge will come from the City of La Vista instead of the Metropolitan Utilities District.
- 2. The flow charge for all sewer service users shall be \$5.13 per hundred cubic feet (ccf).

**Temporary additional flow charges\***

For the period of June 1, 2025 through May 31, 2027, the following supplemental flow charges also shall apply, in addition to the above flow charge, resulting in total flow charges during this period as indicated below:

Residential: additional flow charge of \$.26 per hundred cubic feet (ccf), This will result in a total residential flow charge of \$5.39 per hundred cubic feet (ccf)

Commercial: additional flow charge of \$.23 per hundred cubic feet (ccf), This will result in a total commercial flow charge of \$5.36 per hundred cubic feet (ccf)

\*Temporary additional flow charges recover amounts for increased rates previously authorized September 5, 2023 and September 3, 2024 and unbilled, effective for the period indicated.

- 3. If users have abnormal strength sewage as determined by the terms of the Wastewater Service Agreement between the City of La Vista and the City of Omaha, then additional charges will be billed to the user at the applicable rates as determined by said Agreement.
- 4. If users other than those classified herein are connected to the wastewater collection system, the Customer Charges, the Flow Charges and Other Charges will be determined by the City Council in accordance with rules and regulations of the EPA and the Agreement between the City of La Vista and the City of Omaha.

- A. Levy of Sewer Service Charges. The following sewer service charges shall be levied against the user of premises, property or structures of every kind, nature and description, which has water service from any supply source and are located within the wastewater service area of the City of La Vista.
- B. Computation of Sewer Service Charges. For the months of December, January, February and March, the monthly charge for residential sewer services will be computed on the actual water used for these months. The monthly charge for residential sewer service in the months of April, May, June, July, August, September, October and November will be computed on the average water usage of the four (4) preceding winter months of December, January, February and March or for such portion of said consumption, whichever is the lesser. At the option of the City of La Vista, water used from private wells shall be either metered or estimated for billing purposes.
- C. Amount of Sewer Service Charges. The total sewer service charge for each sewer service user will be the sum of three (3) charges: (1) customer charge, (2) flow charge, and (3) abnormal charge.
  - 1. The customer charge is as follows
    - a. For sewer service users classified as Residential, the same being sewer service to a single family dwelling, or a duplex, apartment, or other multi-family dwelling (e.g. apartments) wherein each dwelling unit has a separate water meter that is read and charged for water and sewer use by the Metropolitan Utilities District - \$13.49 per month.
    - b.     - c. For sewer service users classified as General Commercial: Customers who normally use less than 100,000 cubic feet of water per month and

who are not Residential users or Residential-Multi-Family users - \$14.47 per month. For sewer service users in this category that require manual billing, add \$10.00 for a total of \$24.47. The manual billing of the customer charge will come from the City of La Vista instead of the Metropolitan Utilities District.

2. The flow charge for all sewer service users shall be \$5.13 per hundred cubic feet (ccf).

**Temporary additional flow charges\***

For the period of June 1, 2025 through May 31, 2027, the following supplemental flow charges also shall apply, in addition to the above flow charge, resulting in total flow charges during this period as indicated below:

Residential: additional flow charge of \$.26 per hundred cubic feet (ccf), This will result in a total residential flow charge of \$5.39 per hundred cubic feet (ccf)

Commercial: additional flow charge of \$.23 per hundred cubic feet (ccf), This will result in a total commercial flow charge of \$5.36 per hundred cubic feet (ccf)

\*Temporary additional flow charges recover amounts for increased rates previously authorized September 5, 2023 and September 3, 2024 and unbilled, effective for the period indicated.

3. If users have abnormal strength sewage as determined by the terms of the Wastewater Service Agreement between the City of La Vista and the City of Omaha, then additional charges will be billed to the user at the applicable rates as determined by said Agreement.
4. If users other than those classified herein are connected to the wastewater collection system, the Customer Charges, the Flow Charges and Other Charges will be determined by the City Council in accordance with rules and regulations of the EPA and the Agreement between the City of La Vista and the City of Omaha.

NDOT PROJECT PROGRAM SUPPLEMENTAL AGREEMENT 84 <sup>TH</sup> STREET TRAIL, GILES TO HARRISON	◆ RESOLUTION ORDINANCE RECEIVE/FILE	PAT DOWSE CITY ENGINEER

**SYNOPSIS**

A resolution has been prepared authorizing the Mayor to execute a Project Program Supplemental Agreement with Nebraska Department of Transportation (NDOT) for cost share for the construction of a trail system on both sides of 84<sup>th</sup> Street from Giles Road to Harrison Street. This amendment is to memorialize the timing of expected reimbursements to the NDOT.

**FISCAL IMPACT**

The FY25/FY26 Biennial Budget provides funding for this project.

**RECOMMENDATION**

Approval.

**BACKGROUND**

The City previously executed a Project Program Agreement with NDOT for the 84<sup>th</sup> Street Trail Project, to which \$5,000,000 was secured in Congressional Discretionary Funds on August 16, 2022. Upon approval of the bid for construction, the NDOT invoiced the City for \$5,067,701.50, which is the estimated costs associated with Construction and Construction Engineering. In discussions with the NDOT, as to better align with cash flowing the City's cost share of the project, NDOT has invoiced the City for \$1,275,000.00, or 25% of the City's share and the remaining 75% is to be invoiced on or after February 1, 2026. This allows the City time to secure bond funding for the remainder of the project.
